INDUSTRIAL SERVICES

Shop and Field Inspection Services

Our experts support you with comprehensive engineering and inspection services that cover the full range of construction activities.

ERGOCERT HELLAS S.A. can offer intelligent solutions - for maximum safety, functionality, and trouble-free operations of your plants and systems.

Among other activities, we provide **Shop & Field Inspection** Services.

Shop Inspection involves activities at the manufacturer facilities and **Field Inspection** involves activities during construction / upgrade / erection of units such as pipelines, power plants, refineries, valves and compressor stations.

We have in-depth knowledge of the challenges faced by you, your suppliers and partners, wherever you operate or wherever your project will be carried out.

Whether you are an operator, owner, investor, insurer or supplier of an industrial project, equipment, infrastructure or facility, we speak your language and can offer you the best suitable services for your needs.

Industrial manufacturing

Whatever equipment or components you manufacture; our experts provide support during product design and at every stage of your supply chain across the globe with a fast turnaround time. We check and certify the safety, performance and quality of your industrial products and materials.

Our worldwide network of experts and inspectors is perfectly familiar with country-specific regulations and can help you to gain product approvals and certification for your target market.

We assess and certify quality management systems and applicable processes and procedures and provide training as well as personnel qualification.

Natural Gas Components (pipelines, valves station, metering station, compressor stations)

With large investments, new technologies, tight project schedules and increased legal, commercial and environmental requirements, the challenges facing you are numerous.

As one of the leading service providers for the energy sector, we support you with certification and inspection services for all phases of your project (pre-fabrication, erection, commissioning etc). Whether you are involved in the planning, construction, or operation we can help you to optimize your processes ensuring trouble-free operation of your plant and equipment so they maintain their value and provide

maximum service life.

Power plants & Refineries

Ensuring maximum safety, functionality, and trouble-free operations of your plants and systems is essential. In the event of damage, downtime or loss of production, additional costs can occur.

We support you with our services along the whole plant life cycle right from the beginning to optimize your investments ensuring safety, quality and reliability.

We have the expertise to support you in safe and profitable planning, construction, operation and maintenance or even decommissioning of your facilities and relocation of your plant.
